

WBOP Payment System Security Settings

When trying to access the WBOP Payment System on the Walton Band web site (www.waltonband.org), you may encounter a strange error such as illustrated below. This is especially true if you are using Internet Explorer. Firefox does not seem to be affected.

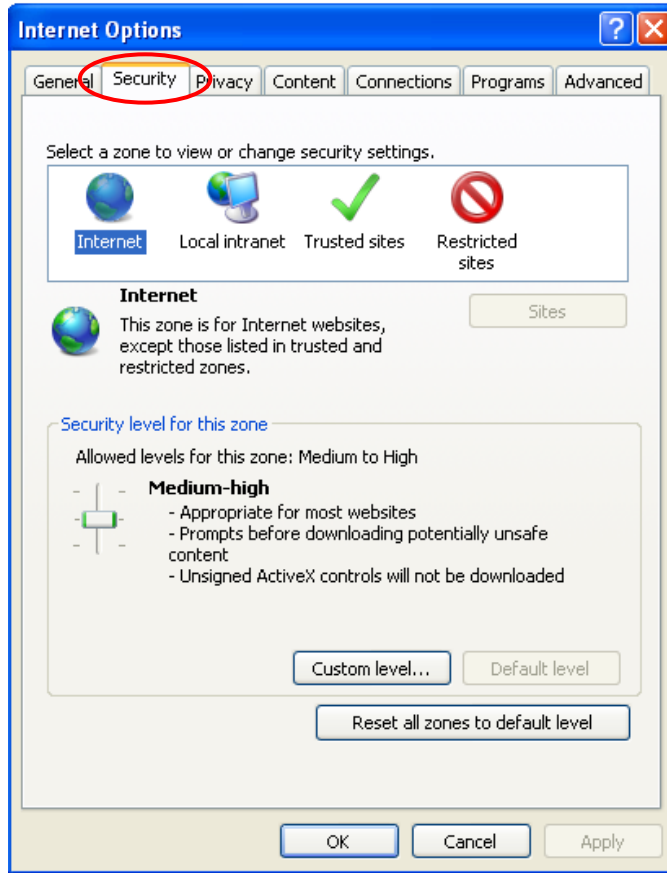

To resolve the error, you need to set the Walton Band web site as a trusted site. The steps below easily walk you through the process to do this.

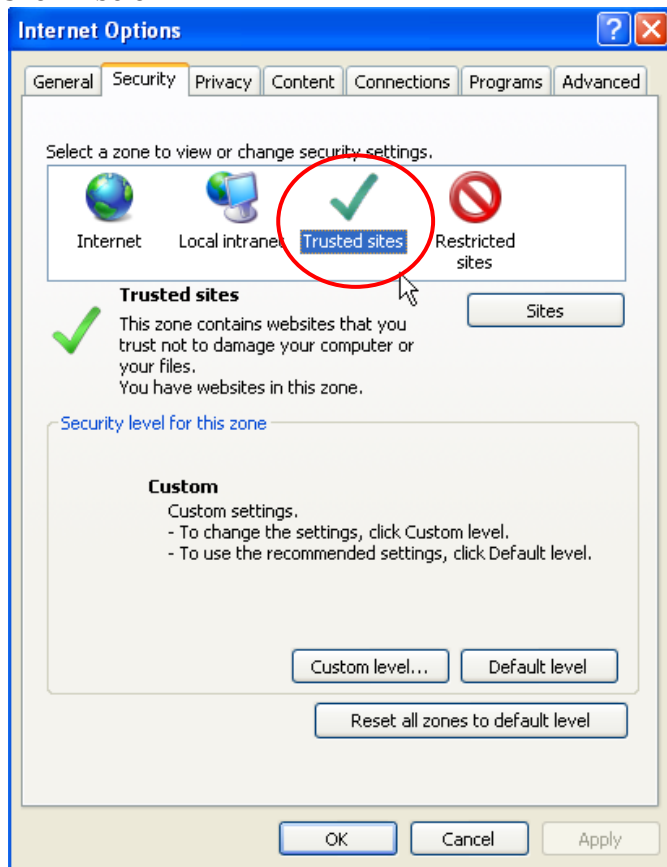

1. Click on **Tools** and then click on **Internet Options** as shown below.

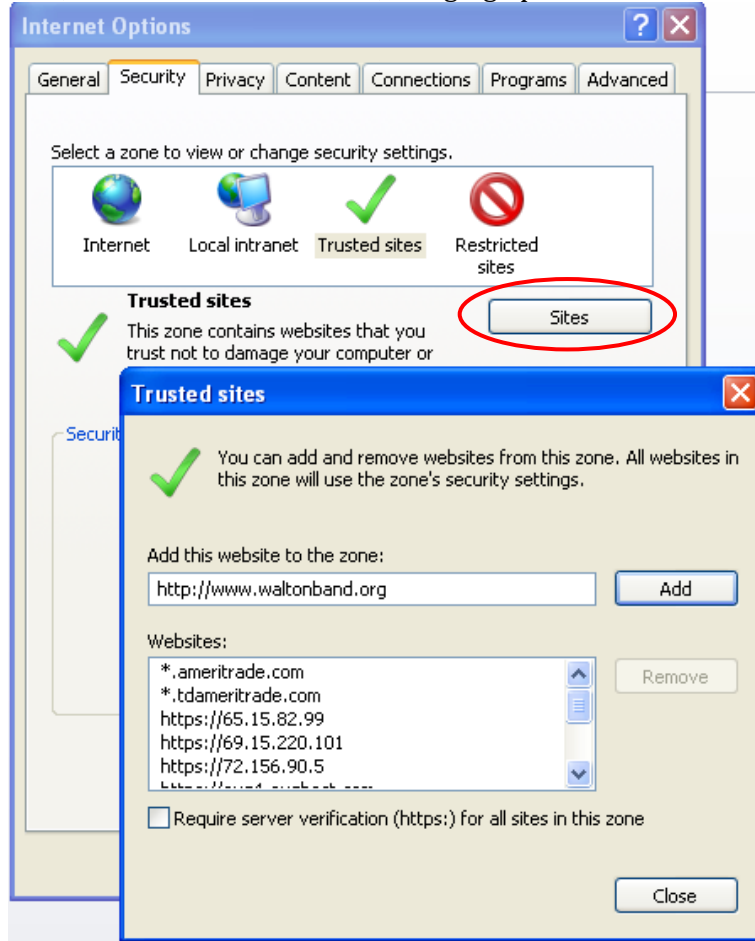

2. When the **Internet Options** window appears, click on the **Security** tab as shown below.

3. After clicking on the Security tab, click on the **Trusted sites** icon, bringing up the Trusted sites panel, as shown below.

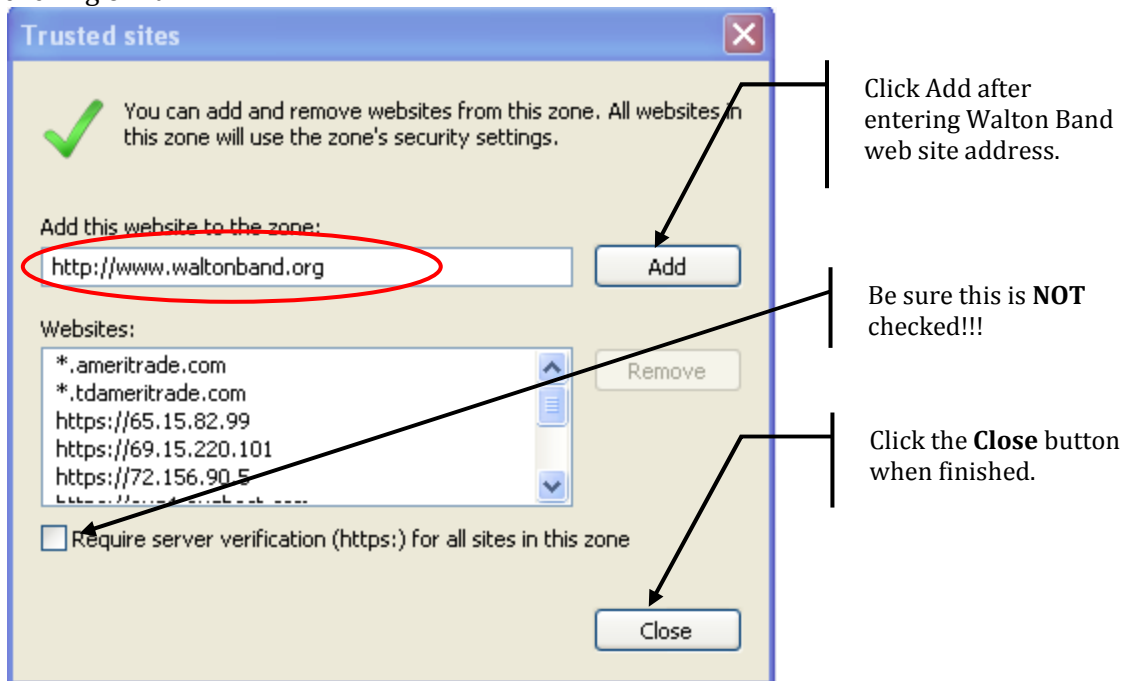

4. Next, click on the **Sites** button, bringing up the **Trusted Sites** window as shown below.

5. Now the last step!

- a. As shown below, enter the Walton Band web site address, www.waltonband.org, and click **Add**.
- b. Be sure the "Require server verification (https:) for all sites..." is **NOT** checked. If it is, uncheck it by clicking on it.

c. Restart Internet Explorer.

6. If your changes were successful, then you will see the following window when you click on the “**Click here to pay**” link on the Walton Band home page.
